HOW EACH ENQUIRY IS CHECKED

Real patients, checked contact details

Email address
We check the address can receive email and flag temporary inboxes. When the patient presses the confirm link we send them, the enquiry shows it as confirmed.

Mobile number
We check it against Ofcom's UK number ranges, so you can see it is a real UK mobile. Numbers that look made up are flagged.

Consent
The patient asked us to send their enquiry to relevant clinics, so they expect to hear from you.

Where they are
Where the patient told us they live, and whether they sent the enquiry from a UK internet connection.

You see these checks beside each enquiry, before you spend a credit.

Up to 5
clinics see each enquiry, all offering the treatment

At most 3
